

1200mm x 800mm = **0.96m**

## 12mm STS Construction Board

A board recommended for both **internal and external use.**

- A1 fire rated, stronger than plasterboard, impervious to moisture
- Multiple use board - easy to cut, handle and store
- Counter staff Product & Sales training provided by STS, so your staff have the confidence to sell
- STS can visit your customers' sites to advise on specification, plus provide method statements for non standard jobs
- 90 day sales promise - if your initial stock doesn't sell, we'll take it away and provide you a refund

A stronger partition walling material than plaster board, 12mm should be your first choice in wet areas. Impervious to moisture, it's the preferred substrate to carry large, heavy wall tiles. Plus it's impact resistant, providing a tough, long lasting walling material that gives you a solid feel to the touch. Securing fixings, such as towel rails, are no problem and it comes with an A1 fire rating, so it's ideal to line out fireplaces before tiling and installing log burners. It's a versatile board that suits lots of applications, including for external use as a render board.
