Fugalite® Eco Invisible

LIQUID GLASS FOR PERFECT JOINTS

CERTIFIED, ECO-FRIENDLY, PHOTOCHROMATIC VITREOUS, HIGH-SLIDE, EASY-TO-CLEAN GROUT AND ADHESIVE, BACTERIOSTATIC AND FUNGISTATIC, WATER AND STAIN PROOF, FOR JOINTS OF BETWEEN 0 AND 3MM, TO GUARANTEE THE APPEARANCE, FUNCTIONALITY AND HYGIENE OF GLASS MOSAIC AND CERAMIC SURFACES, IDEAL FOR USE IN GREENBUILDING. WITH VERY LOW VOLATILE ORGANIC COMPOUND EMISSIONS.

REVOLUTIONARY

**PURE
TRANSPARENT
RESIN**

Fugalite® Eco Invisible is liquid “glass” obtained from a perfectly calibrated mixture of **tiny, pure glass beads** and an exclusive **transparent resin**, ideal as an adhesive for laying and grouting of glass mosaic. The excellent workability and cleanability of Fugalite® Eco Invisible during the application phase ensure a **perfect, smooth, even grout** that enhances ceramic and glass mosaic surfaces.

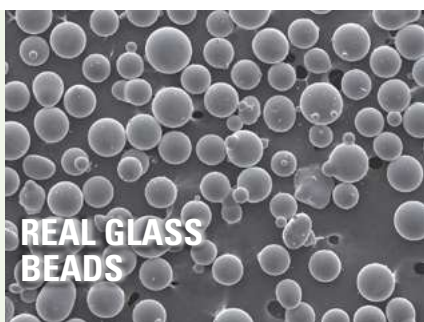

INVISIBLE

**SEMI-TRANSPARENT
EFFECT**

The **opalescent, semi-transparent** appearance of Fugalite® Eco Invisible grout has been tested by the GreenLab laboratories to guarantee maximum aesthetic compatibility with wood and marble effect tiles.

Fugalite® Eco Invisible makes the joint “invisible”, guaranteeing a **surface with an even colour and appearance**, something that cannot be achieved with any other coloured opaque cement-based grout.

**REAL GLASS
BEADS**

*Scanning electron
microscope view
of the glass beads*

**SEMI-TRANSPARENT
JOINTS DISAPPEAR**

*Ideal for wood
and ceramic
marble laid
edge-to-edge*

* Centro Ceramico Bologna has passed the test for Resistance to stains following UNI EN ISO 10545-14 (Test Report N° 3685/11).

Fugalite® Eco Invisible: intelligent laying and grouting of glass mosaic

Fugalite® Eco Invisible is the ideal solution for the safe and long-lasting laying of glass mosaics, guaranteeing perfect diffusion of colour shades and an unparalleled aesthetic continuity.

PHOTOCHROMATIC

Light as a pigment that colours the grout. This is the challenge won by the Kerakoll® researchers, making Fugalite® Eco Invisible unique and inimitable.

An **idea that is simple and effective**, but hard to achieve, and is only made possible thanks to a perfect balance of high quality ingredients. The shades of colour in the blends of glass mosaic grouted using Fugalite® Eco Invisible **will be perfect**. Inserts, decorations, shapes will no longer be a problem.

Diffusion and diffraction of light "colours" the grout

WATER-RESISTANT CLEAN AND SAFE

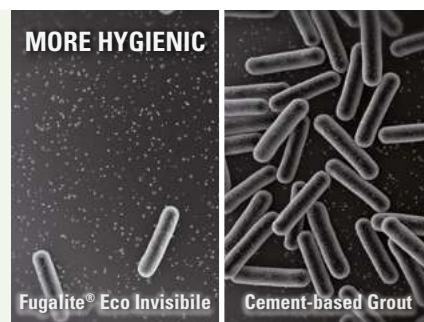

Fugalite® Eco Invisible

Cement-based grout

Just like glass, Fugalite® Eco Invisible is waterproof, **easy to wash and keep clean**. Makes the surface safe from bacteria, mould and fungi even in very damp environments. **Strong and easy to maintain**, it ensures long-term durability while retaining the aesthetic quality and beauty of the mosaics and coverings.

Fugalite® Eco Invisible is designed to improve people's health and well-being.

MORE HYGIENIC

Fugalite® Eco Invisible

Cement-based Grout

The smooth, waterproof surface of the grout makes the joints safer and easier to keep clean

SEMI-TRANSPARENT

Joints disappear

PHOTOCHROMATIC

Enhances mosaic

WATER-RESISTANT

Easy to clean

Fuga-Glitter

Fuga-Glitter in **Gold** and **Silver** colours emphasizes the **shade and detail of the covering** by creating a constant play on the reflections of the glitter. Fuga-Glitter is a **bright, ultra-fine powder** that can be easily added to Fugalite® Eco in the proportions required to create the desired effect.
