INSTALLATION OPTIONS FOR 2.0CM EXTERNAL PORCELAIN

ON SOLID BASE

ON SAND OR GRAVEL BASE

ON RAISED PEDESTALS SYSTEM

Always seek professional advice regarding installation, either from your local supplier or selected landscape installer. We recommend the use of a primer to the reverse of each slab, which assists in providing an excellent bond between the porcelain and the surface below. (Not required for pedestal installation).

Thanks to state-of-the-art technology for manufacturing
PORCELAIN STONEWARE

Porcelain Paving (Features & Benefits)

Thanks to modern technology a product with superior strength has been manufactured, to provide a safe surface for outside use. Being resistant to absorption ensures that porcelain paving requires little to no maintenance. There is no requirement to seal as the porcelain is stain and mildew resistant, spillages cannot penetrate the surface so they are easily cleaned away. It also offers an amazingly hard wearing scratch resistant surface making it the perfect solution for patios, terraces, driveways and garden paths in fact all outside areas.
