Efficient removal of wastewater from a single WC and basin/shower

Premium Range of Bathroom Taps...

Enhance your Bathroom with the perfect finishing touches...

Our range of Bathroom Taps combines superior quality with great design, functionality and durability, offering real value for money.

Water Pressure:

All taps operate 0.2 to 6.0 bar unless stated otherwise.

LP = Low pressure of 0.2 bar minimum.

MP = Medium pressure of 0.5 bar minimum.

HP = High pressure of 1.0 bar minimum.

10 Year Manufacture Guarantee

Brassware and all components are rigorously tested to ensure high levels of quality and durability. We use corrosion resistant grade A, 3.03m thick die casting brass with an exceptional high strength one piece cast.

Cool Start Technology

Energy and cost Saving Feature

Most basin mixer taps when operated even if turned to cold, will fire up the boiler. Cool Start Technology allows cold water to pass through the tap without firing up your boiler.

Eco Flow

Look out for this logo on our Basin Mono's which include the Eco Flow technology that saves between 11 and 18% of water compared with a normal cartridge.

Easy Clean Wastes Included

Our Basin Mono's include a click clack waste, that lifts out for Easy Cleaning. For more Waste options see pages 192 - 193.

Directional Aerator

Look out for the Directional Aerator logo, for Basin Mono's that have an aerator that swivels to the touch, allowing the flow of water to be pointed in a different direction.

Ventilation Fans

Remove excess humidity and moisture from your bathroom

Combat the harmful effects of condensation...

Building Regulations

Comply with Buildings Regs: Document F Ventilation 2010. Our fans exceed Building Regulations

CONDENSATION

Without proper ventilation, there is a risk of developing mould and mildew which can be damaging to your health.

DAMAGE TO YOUR HOME

Over time, condensation and moisture can be damaging to your bathroom and home:

- Rust on metal fittings
- Damage / swelling to wood
- Paint & wallpaper deterioration

MOULD & MILDEW

Risk of developing mould and mildew which can be damaging to your health. Microscopic mould spores can be inhaled, triggering asthma, allergies and skin disorders.

Where can you position your fan?

Fans can be Ceiling or Wall Mounted

Fans should be positioned to give optimum flow of air through the whole room, consider the position of window openings and doors. DON'T FORGET a fan can only extract air if there is air coming in to replace it. Undercutting of doors may be needed to allow air into the room.

Fans should be mounted as high as possible, well away from primary heat sources such as gas water heaters and boilers.

- Zone 0:** No fan suitable
- Zone 1:** Recommended any Quiet Fan or iCON 12v eco fan.
- Zone 2:** Any iC, Quiet or Vent Fan.

Wall/Ceiling Cladding

...thick
...tiling walls or traditional ceiling coverings...

Useful Tip!

Cladding is produced in Batches, make sure you calculate the correct number of panels required and check colour matching before installation.

Shower / Cladding Lights

We recommend our LED light fittings for use with our Cladding when installed in a ceiling situation.

Our LED lights generate minimal heat in comparison to regular halogen down lights.

Annual running costs for our LED lights are about 95% lower than the running costs of regular 50w Halogen lights.

Features:

- Suitable for all wet areas
- Energy Saving LED technology
- IP65 rated - Zone 1
- 5 watt / 450 Lumen Output
- Equivalent to 50w halogen bulb
- 5 Year Manufacturers Guarantee
- Retro Fit
