# THE KERATECT® SPECIAL GLAZE

The Geberit KeraTect® special glazing ensures many years of protection for ceramic surfaces.

KeraTect® is baked on as a special glaze and has a virtually non-porous and extremely smooth surface that can be kept clean easily and efficiently.

The properties of KeraTect®:

- Virtually non-porous and extremely smooth
- Dirt-repellent, hygienic and clean
- Very easy to clean and look after
- Durable and scratchproof

**INNOVATIVE FLUSH TECHNOLOGY**  
 Geberit Rimfree® toilets are equipped with a specially developed and patented flush guide which ensures a targeted and hygienic flush every time.

## CLEANLINESS EASY TO CLEAN: **RIMFREE®**

Keeping the bathroom spotless is a must, because cleanliness and hygiene are so important, especially in the bathroom. Most people want to avoid harsh chemicals and no one wants cleaning to be a hassle. This is why Geberit have introduced the Rimfree® toilet so there are no more hard to reach places.

Rimfree® has a completely new and patented flush technology. The flow of water is controlled just before it reaches the ceramic pan – the flush guide sends the water stream along both sides to the exact area where it is needed for a clean and thorough flush.

[www.geberit.co.uk](http://www.geberit.co.uk)

↑  
 Common toilet pans depend on a flush rim which cannot easily be cleaned. Dirt and bacteria accumulate in this difficult to reach place resulting in unpleasant odours.

↑  
 With the Geberit Rimfree® technology however, there is no rim. The smooth inner surface of a Geberit Rimfree® toilet pan can be cleaned with one swipe. And best of all, one can see immediately if all dirt has been removed.

COMFORT

At the same time, we have invested into developing innovative technology and comfort functions, making our shower toilets the market leader. Depending on the model, a host of features make for a truly pampering experience.

## GEBERIT

### DUOFRESH

### MODULE

#### UNPLEASANT ODOURS IN THE TOILET ARE A THING OF THE PAST

It is completely normal to have an extractor fan over the hob in the kitchen to remove unpleasant odours and now the same principal is available in the bathroom.

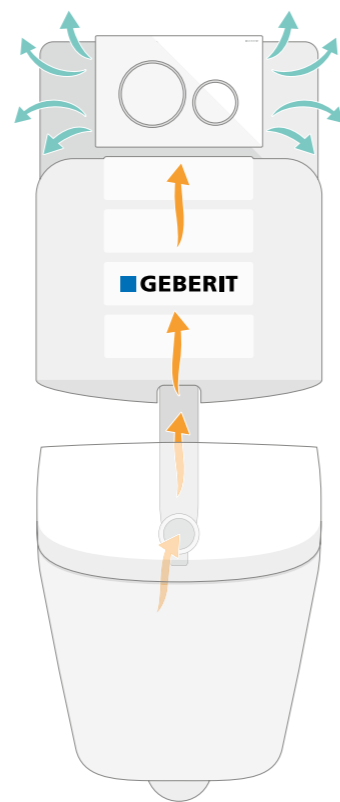

The Geberit DuoFresh module removes the bad air directly from the toilet and purifies it using a ceramic honeycomb filter and then returns it to the room. This is extremely effective, as it prevents unpleasant odours from spreading throughout the bathroom in the first place, rendering air fresheners, lighting candles and opening windows completely unnecessary. Thanks to a proximity sensor, the odour extraction always switches on automatically as soon as someone sits down on the toilet. The odour extraction is therefore also a great idea for guest bathrooms. In addition, an LED orientation light and the insert for in-cistern sticks can also bring you added comfort. The Geberit DuoFresh module can be easily installed in any Geberit Sigma cistern and can be combined with almost any flush plate from the Sigma range.

[www.geberit.co.uk](http://www.geberit.co.uk)

 **EFFICIENT**  
The air is purified by the ceramic honeycomb filter.

 **QUIET**  
A quiet fan conveys the purified air back into the room.

 **ACCESSIBLE**  
The ceramic honeycomb filter and insert for in-cistern sticks can be easily accessed via the flush plate.

 **GEBERIT DUOFRESH MODULE**  
The ceramic honeycomb filter is easily accessible via the flush plate.

Shower drain blockages are a thing of the past thanks to the easy-to-clean comb insert.

**CLEAR DESIGNS, SLIM CONTOURS, GENTLE CURVES**  
The washbasins from the Geberit Acanto bathroom series are presented in a timelessly modern soft organic design, with clear geometric contours and organically shaped inner basins. They are available in different variances as standard, slim or compact basins in a variety of sizes. Geberit is meeting the

desire for attractive, modern and individually designed bathrooms. The SlimRim design gives washbasins a particularly elegant, slender appearance. The standard washbasins are available with and without shelf surface or with short projection for en-suites and guest bathrooms.

# GEBERIT ACANTO BATHROOM FURNITURE

## FURNITURE TO EXPRESS YOUR INDIVIDUALITY

The Geberit Acanto bathroom furniture offers freedom of design and functional excellence. Following extensive tests with customers, the series has been ergonomically designed to meet the widest variety of everyday needs. The inside of the furniture is surprisingly flexible, with the arrangement of the drawers, compartments and shelves creating an uncluttered environment. A magnetic board, which can be mounted on the wall, enables storage trays or brackets to be attached precisely where the cosmetic items are needed. The innovative design concept transforms the mirror cabinet above the washbasin into a

focal point with a built in magnifying mirror offering greater versatility.

With a wide range of washbasin cabinets, tall cabinets, mirror cabinets and shelf solutions, the Geberit Acanto bathroom furniture creates the perfect storage space for every bathroom. The furniture is available in four colours; lava, sand grey, white and black.

The designers of the bathroom furniture placed a particular emphasis on a modern combination of different materials and surfaces such as glass, metal, painted and wood finishes, not to mention the individual composition of the different furniture types.

The straight lines are also characteristically rounded and offer a look that is both solid and delicate at the same time. The hidden wall fixing and the closed outer contour, rounds off the understated design, is easy to clean and also contributes to the balanced overall appearance. The toilet seat combines with the toilet ceramic appliance in a stylish and sophisticated way and is optionally available with a soft closing mechanism. The non-porous surface is completely smooth and therefore dirt repellent and easy to clean. The bidet design perfectly matches that of the toilet and is also KeraTect® glazed.

Minimalist and superior in design, convenient and versatile in function.

As an expression of the natural clear lines, Geberit Xeno<sup>2</sup> washbasins have a slightly raised tap hole bench with a narrow platform to the edge of the basin. The absence of overflow holes means that the aesthetics of the inner basins flowing forms are not disrupted. The clear design statement also offers advantages when it comes to hygiene and ease of cleaning.

**SLIM LINES FOR EXCLUSIVE WASHBASIN AREAS**

Geberit Xeno<sup>2</sup> washbasins made of the solid surface material Varicor® stand out due to their particularly slim rim. Together with the matching bathroom furniture, they create highly exclusive bathrooms featuring washbasin areas that are spacious while at the same time boasting a lightweight appearance. Hidden overflow

The washbasins of the Geberit Citterio bathroom series embody simple and timeless elegance in unmistakable Italian design.

Symmetrical lines frame gently rounded inner basins and provide generous space for washbasins. A perfectly designed and specially developed, ceramic waste cover is seamlessly incorporated into the basin design. Nothing can disrupt the aesthetics of the washbasins, as they are designed without an overflow hole, which is made possible by the patented Geberit washbasin connector Clou.

## GENUINE ITALIAN DESIGN GRANDEUR

The generous storage space solutions complement the puristic organic elegance of the Geberit Citterio bathroom ceramics. The design series is synonymous with a distinctive ordered aesthetic.

High quality glass cover plates in shades to match the chosen furniture colour lend the Geberit Citterio bathroom furniture an additional shine. The combination of wood and glass results in an elegant contrast, rounded off by the door handles in on-trend champagne.

# GEBERIT **ONE**

# GEBERIT ONE

Geberit ONE combines Know-How in sanitary technology with design expertise, presenting a pioneering, fully integrated and comprehensive solution for the entire bathroom. This is made possible by integrating many components behind the wall. Cleverly combined in a single system, Geberit ONE has the chance to demonstrate its many benefits, both obvious and hidden. This means greater cleanliness, more space and greater flexibility in the bathroom. **Functional design for a better quality of life.**

**NICHE STORAGE BOX**  
The interior of the niche storage box is designed to prevent water and dirt residues, as water cannot accumulate and flows unimpeded from the box.

**FLUSH PLATE**  
Geberit Sigma50.

**SHOWER DRAIN**  
The shower drain is integrated in the wall.

**TOILET**  
When the toilet is flushed, TurboFlush ensures that the water flows laterally into the ceramic appliance and spirals through its interior. Thanks to the optimised way in which the flow of water is guided, the flush is not just very quiet, but also extremely thorough.

**TAP**  
The wall mounted tap ensures that the entire washbasin remains free. This means surfaces where dirt and germs can accumulate commonly in the area around deck mounted taps are prevented.

**WASHBASIN**  
One of the highlights of Geberit ONE is the washbasin drain. As it is cleverly positioned at the back edge of the bowl, it is not directly in the water jet's line of fire, thus impeding the formation of limescale and water residues.

KeraTect®

Thanks to its functional design and clever features the washbasin area is the focal point of the bathroom with Geberit ONE.

The Geberit ONE washbasin ceramic appliance has two models, a floating design or for installation with furniture. With a depth of 400mm, it takes up very little space and wall mounted taps give a sleek finish. The cleverly positioned washbasin drain also contains clever features for easy cleaning and maintenance.

# GEBERIT ONE WASHBASIN CABINET

## THE SURPRISING SPACE SENSATION

Geberit ONE washbasin cabinets have a depth of just 400mm and come in a variety of widths. They boast an impressive amount of storage space that even dwarfs that offered by conventional models with a standard depth of 480mm. This phenomenal spaciousness has been realised by shifting the washbasin trap to the function box inside the prewall. The washbasin cabinets are available in two colours, a walnut real wood veneer and white high gloss coated.

# GEBERIT ONE TOILET

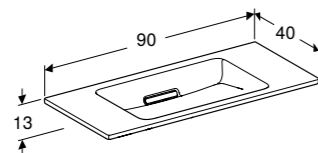

The wall-hung Geberit ONE toilet is both elegant and perfectly proportioned. The asymmetrical, completely rimless inner geometry of the ceramic pan ensures an outstanding and ultra-quiet TurboFlush. Thanks to the sophisticated installation technology, the height of the toilet can be flexibly adjusted without needing to open up the prewall, even years after being installed. The design of the toilet seat means it can be removed easily for cleaning.

# GEBERIT ONE SHOWER SOLUTIONS

When it comes to the shower area, Geberit is able to meet many different demands. The floor even model is proving particularly popular. The integrated Geberit niche storage box not only saves space, but is also designed to prevent water and dirt residues.

**HYGIENIC, CLEAN AND SIMPLY BEAUTIFUL:  
GEBERIT SHOWER CHANNELS OF THE  
CLEANLINE SERIES FOR FLEXIBLE  
BATHROOM DESIGN**

Geberit CleanLine breaks new ground in shower drainage. It does not discharge the water invisibly in a channel but instead via elegant stainless steel collector profiles. There are no hidden areas meaning that dirt is prevented from accumulating and leading to unpleasant odours. Simply wipe over the profile once and everything is clean.

Geberit CleanLine is considerably more flexible than many other shower drainage solutions as the collector profile can be simply cut at both ends and adjusted to the nearest millimetre depending on the room conditions.

# GEBERIT WALL DRAIN FOR SHOWERS

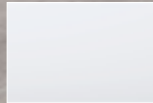

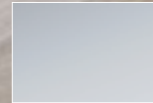

## TAKING THE FLOOR EVEN SHOWER A STEP FURTHER

The Geberit wall drain shifts the drainage of floor even showers from the floor to behind the wall. Not only does this look very attractive, it also makes it easier to install a floor even shower. Both the drinking water and waste water installations are behind the wall and the floor can be tiled throughout. This also makes it possible to install underfloor heating without interruption.

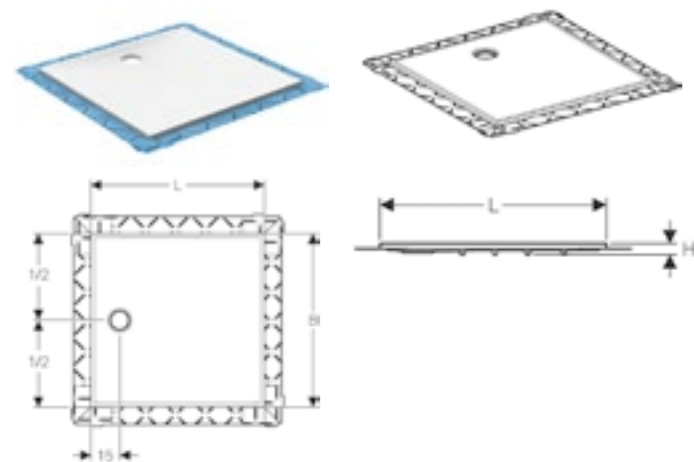

All that remains visible is a small cover on the wall that can be easily removed to clean the comb insert behind. The cover is available in various surface finishes and can also be tiled to match the design of the wall.

# AS YOU LIKE IT

The trend towards individualisation also brings with it increasing demands for design options in the bathroom that are as diverse as possible. These are often nuances that have to be perfectly co-ordinated. New finishes on both the metal detail and the plate itself in the Sigma21 and Sigma50 range can make a bathroom truly on trend.

## ODOUR EXTRACTION

# FRESH AIR FOR EVERYONE

### PULL THE FLUSH PLATE ASIDE, INSERT THE STICK, THEN CLOSE THE PLATE

That's how easy it is to ensure weeks of hygienic freshness with the insert for in-cistern sticks. The optional insert is suitable for most Geberit flush plates in the Sigma range and can even be installed by a plumber at a later date. It guides the in-cistern stick down a chute to a fixed position below the surface of the water in the cistern. Once there, the stick dissolves slowly and ensures hygiene and cleanliness in every flush throughout the entire toilet ceramic appliance, as well as providing a fresh fragrance.

**ACCESSIBLE**  
The ceramic honeycomb filter and insert for in-cistern sticks can be easily accessed via the flush plate.

←  
It doesn't get any simpler than this: pull the flush plate aside.

←  
Place the in-cistern stick into the insert behind the plate.

←  
Close the plate and enjoy the freshness with every flush.
