INTRODUCING THE NEW QUARTZ™ COLLECTION

Founded on innovation leadership, Aqualisa has created a new range of next generation shower controls that establishes showering as an integral part of the smart home.

SMART • CONNECTED • SIMPLE

The Quartz Collection shower range, from the leading name in smart shower technology, brings together the most sophisticated, yet accessible and user-friendly, choice of connected showers available in the market.

QUARTZ TOUCH™

Even the most advanced smart control remains simple and intuitive with Quartz Touch, Aqualisa's most personal showering experience. A choice of pre-set shower programmes or individual shower and bath settings for the whole family, from anywhere, is modern showering personified.

See pages 6-9

QUARTZ CLASSIC™

A proven best seller, Quartz Classic now takes its place at the heart of Aqualisa's smart shower range as a connected shower and bath control. Unsurprisingly, the Quartz Collection takes its inspiration from what is, quite simply, the UK's most trusted and recognised name for innovative showering technology.

See pages 10-13

QUARTZ BLUE™

Quartz Blue is our new introduction to the enjoyment of smart showering. Discover the ease and convenience with all the internet enabled settings and controls, including a remote. New generation showering has just become a reality.

See pages 14-17

PERSONALISE YOUR SHOWER SETTINGS & RELAX

With the busy lives we now lead, it is becoming increasingly important to find ways to step back, take a breath and relax. Smart showering technology in the bathroom not only offers flexibility and convenience, but also provides additional lifestyle benefits, from family safety to water saving, above and beyond traditional showering.

With pressure to reduce water consumption per person per day, smart products are a better way to manage water, improve efficiency and lower household bills. In particular, they can provide a solution for family homes and multi-generational requirements, with safety guaranteed and allowing the elderly or those with reduced mobility to remain independent.

The Quartz Collection is now fully connected with your home devices and controlled from the Aqualisa app or by simple voice activation. With the app, every member of the family can create and save a unique showering experience which is ready every time they take a shower. The app will also track water usage, running time and indicate the cost for eco-conscious households.

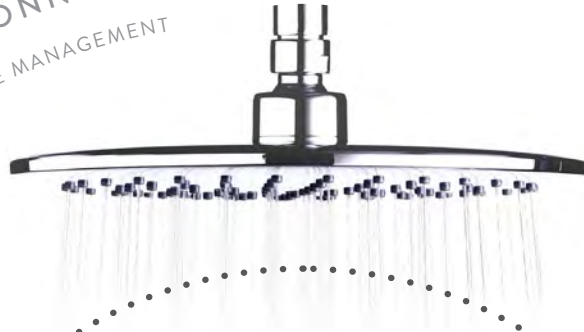

In a choice of modern and compact styles, the Quartz Collection looks good in the showering area while the intelligent Aqualisa SmartValve™ is located up to 10 metres away, making new and replacement installations easy to plan and fit.

“Alexa,
tell my shower
to turn on”

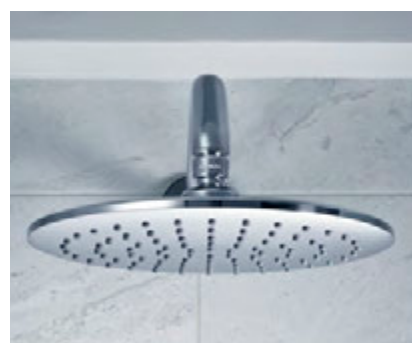

QUARTZ TOUCH™

Make it personal

Imagine your perfect shower. Always ready to step into when you are, and always at the exact temperature you like. Eco-friendly yes, but always sensational and invigorating. That shower is Quartz Touch, which delivers Aqualisa's most varied and personalised shower experience. From a selection of presets to your own personal shower profiles, this shower sets the gold standard for control, precision and consistency.

FLEXIBLE SHOWER CONTROL

Quartz Touch is available as a single or dual outlet option, with the choice of an adjustable handset featuring 4 spray patterns and an optional 230mm fixed drencher head. The shower can also divert to a programmed bath fill function. It's easy to install with all approved domestic water supplies and the app makes it incredibly simple to create and store your shower choices, all activated from your phone, a remote control on the wall or by using voice activation.

QUARTZ CLASSIC™

A great shower has just got better

What more can be said about Quartz Classic? Lasting good looks, a pioneer of shower technology and a UK best seller. Now, it takes its rightful place in the smart bathroom as a WiFi connected shower control. You can expect the same level of performance from this market leading shower but with the added convenience of control from your smart device, a remote control on the wall or by a simple voice command.

OUR FAVOURITE SHOWER HAS EVOLVED

Quartz Classic is available as a single or dual outlet option, with the choice of an adjustable handset featuring 4 spray patterns and an optional 230mm fixed drencher head. The shower can divert to a programmed bath fill function, but Quartz Classic is also available as a control for bath fill only. The familiar Quartz look and feel is set to continue at the forefront of showering excellence as part of the smart home revolution.

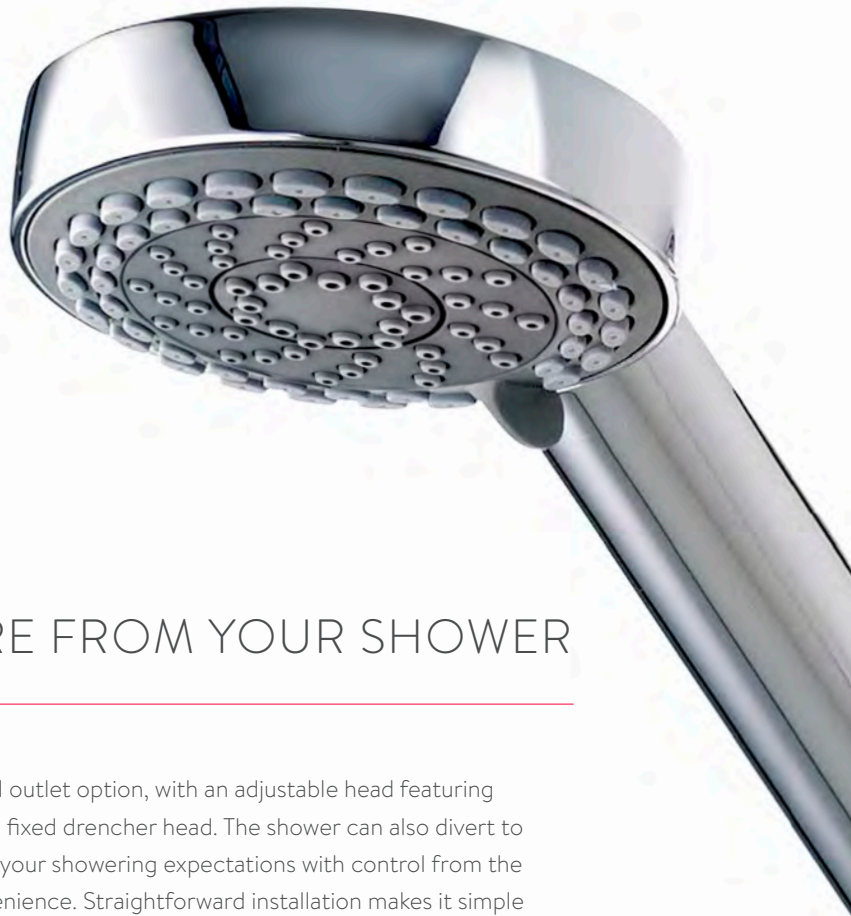

QUARTZ BLUE™

Step into smart showering

Are you ready for a new lifestyle? Quartz Blue is the ideal introduction to smart capability that will change the way you take a shower. With all its individual programme features and WiFi connectivity, the minimalist designer look of Quartz Blue conceals the level of intelligent technology built into this compact, but perfectly formed, shower control.

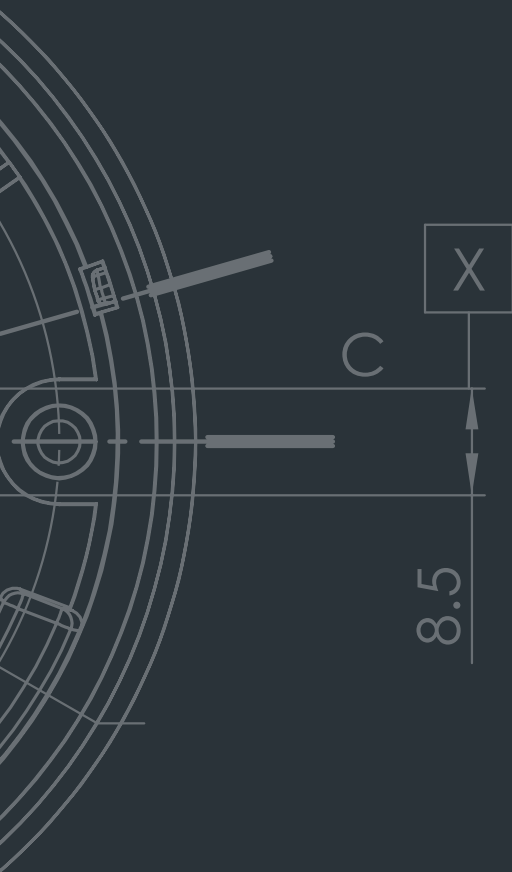

EXPERIENCE MORE FROM YOUR SHOWER

Quartz Blue is available as a single or dual outlet option, with an adjustable head featuring 4 spray patterns and an optional 200mm fixed drencher head. The shower can also divert to a programmed bath fill function. Expand your showering expectations with control from the app or your voice for flexibility and convenience. Straightforward installation makes it simple to experience a new world of sheer, indulgent showering.
