## Shipping Surcharges

Most of you will have heard about unprecedented shipping costs affecting the price consumers pay and increased lead times.

Covid has without doubt been the biggest contributing factor to this problem, including worldwide lockdowns at different times across different markets causing high demand, as well as a shortage of shipping containers.

The cost to ship a 40' shipping container of products from the far east has risen from £2,000 per container to £15,500 over the last 18 months.

This means there is an extra £13,500 of cost that must be shared across the goods in the container.

A container of bulky products such as Bathroom Furniture and Shower Enclosures will incur a higher share of the £13,500 extra cost because there are fewer units in the container compared with a container of taps and showers where there is a much higher number of units to share the extra cost.

We are keeping prices at normal levels but adding a % **surcharge to the products directly affected**, while continually monitoring the shipping cost situation and immediately reducing the surcharge as soon as the market allows.

Therefore, when looking at prices in this brochure - please consider the surcharges below:

Product Type	Surcharge
Shower Enclosures and Bath Screens	15%
Mirrors and Bathroom Cabinets	30%
Waterproof Bathroom Furniture	28%
Special Needs Sanitary ware	20%
Taps, Showers and Bathroom Accessories	5%

## Premium Range of Bathroom Taps...

Enhance your Bathroom with  
the perfect finishing touches...

Our range of Bathroom Taps combines superior quality with great design, functionality and durability, offering real value for money.

### Water Pressure:

All taps operate 0.2 to 6.0 bar unless stated otherwise.

**LP** = Low pressure of 0.2 bar minimum.

**MP** = Medium pressure of 0.5 bar minimum.

**HP** = High pressure of 1.0 bar minimum.

### 10 Year Manufacture Guarantee

Brassware and all components are rigorously tested to ensure high levels of quality and durability. We use corrosion resistant grade A, 3.03m thick die casting brass with an exceptional high strength one piece cast.

### Cool Start Technology

Energy and cost Saving Feature  
Most basin mixer taps when operated even if turned to cold, will fire up the boiler. Cool Start Technology allows cold water to pass through the tap without firing up your boiler.

### Eco Flow

Look out for this logo on our Basin Mono's which include the Eco Flow technology that saves between 11 and 18% of water compared with a normal cartridge.

### Easy Clean Wastes Included

Most of our Basin Mono's include a click clack waste, that lifts out for Easy Cleaning. For more Waste options see pages **160 - 161**.

### Directional Aerator

Look out for the Directional Aerator logo, for Basin Mono's that have an aerator that swivels to the touch, allowing the flow of water to be pointed in a different direction.

## Ventilation Fans

Remove excess humidity and moisture from your bathroom

Combat the harmful effects of condensation...

Fresh Air

**Building Regulations**

Comply with Building Regs: Document F Ventilation 2010. Our fans exceed Building Regulations

### CONDENSATION

Without proper ventilation, there is a risk of developing mould and mildew which can be damaging to your health.

### DAMAGE TO YOUR HOME

Over time, condensation and moisture can be damaging to your bathroom and home:

- Rust on metal fittings
- Damage / swelling to wood
- Paint & wallpaper deterioration

### MOULD & MILDEW

Risk of developing mould and mildew which can be damaging to your health. Microscopic mould spores can be inhaled, triggering asthma, allergies and skin disorders.

## 3 Models to choose from...

### iC Fan

Sleek and stylish appearance  
Flexible installation - many modules to choose from  
Low energy options  
Easy fitting

### Quiet Fan

Whisper quiet  
Powerful extraction  
Various control options  
Room refresh option  
Backdraft flap

### Vent Fan

Compact size  
Quiet in operation  
Shower light option  
High performance for ducted installations  
Install in loft spaces or service shafts

## Where can you position your fan?

Fans can be Ceiling or Wall Mounted

Fans should be positioned to give optimum flow of air through the whole room, consider the position of window openings and doors. DON'T FORGET a fan can only extract air if there is air coming in to replace it. Undercutting of doors may be needed to allow air into the room.

Fans should be mounted as high as possible, well away from primary heat sources such as gas water heaters and boilers.

- Zone 0:** No fan suitable
- Zone 1:** Recommended any Quiet Fan or iCON 12v eco fan.
- Zone 2:** Any iC, Quiet or Vent Fan.

## iC Ventilation Fan

## Shower / Cladding Lights

We recommend our LED light fittings for use with our Cladding when installed in a ceiling situation.

Our LED lights generate minimal heat in comparison to regular halogen down lights.

Annual running costs for our LED lights are about 95% lower than the running costs of regular 50w Halogen lights.

### Features:
